

Paradise Birding Caribbean Bird List
GUADELOUPE, French Antilles; November 2014

<i>The list below includes 134 of the 273 birds recorded on Guadeloupe, those species considered the most likely to be encountered. The column for "Nov 14" includes the birds seen on our scouting tour in November 2014, when we focused on the endemic species and only spent 4 full days on the island. Our 2016 tour will spend 6 full days exploring the main island and several of the smaller islands in the archipelago.</i>
